

## Cracking on wind slabs in Beehive

Beehive Basin  
Northern Madison  
2/7/2019  
Code  
Latitude  
45.32670  
Longitude  
-111.38700  
Notes

Skiers got 4-6" wind pockets to propagate in the trees at lower elevations in Beehive Basin. Wind slabs were thicker in more exposed areas and likely more reactive at higher elevations.

Number of slides
