Human triggered and natural on Buck Ridge

Buck Ridge Northern Madison 2/6/2020 Code SS-AMc-R2-D1.5-I Elevation 9300 Aspect NE Latitude 45.17190 Longitude -111.38000 Notes

We triggered an avalanche in the second Yellow Mule off Buck Ridge on 2/6/2020. It is on a small roll/<u>cornice</u> "in the flats". It broke within the current 2-3' storm snow,18-24" deep.

We also saw a couple natural avalanche crowns 10-18" deep lower down the drainage. I'm sure there were a ton more crowns there, and probably everywhere. through the forecast area. Visibility was limited to 50-100'.
