

N Bridgers - South Aspect Below Texas Meadows shoulder

Date

Sun, 01/10/2021 - 14:15

Activity

Skiing

Snowboarding

Dug a pit on a S facing aspect at 7200'. Found about 55-60 cm snow depth. Performed a hand harness test and found a layer of fist hardness down to about 22 cm, 4F hardness for a super weak 1-2 cm faceted layer sandwiched between the top layer and a bottom layer of pencil hardness. Performed compression test for CT15 Q1.

Region

Bridger Range

Location (from list)

Texas Meadow

Observer Name

Riley Fitzgerald
