

Routine avalanche mitigation within the boundaries of Bridger Bowl sympathetically caused half of the Football Field on Saddle Peak to avalanche immediately south of the boundary. "Debris ran over the cliffs pulling out spindrift cones that were up to 5 ft deep." Photo: BBSP

\*Note: BBSP does not perform any avalanche mitigation outside of the ski area boundaries

Advisory Region

Bridger Range

Longitude

-110.94W

Latitude

45.79N
