 Wind: **W**

**HS:63**    Layer Notes:  
 19-10cm: **Problematic layer**

Notes: Westerly winds were blowing today, moving lots of snow along the high ridgelines. Snowpit was in a relatively deeper snowpack location. We found about HS 40-60cms.  
 Near and along the ridgeline, I was getting lots of subtle collapsing and cracking (not making much sound- muffled by the new snow?), but that was traveling 30' or more in many places.
