

Airplane bowl avalanche, North Bridger Range

Airplane Bowl

Bridger Range

3/7/2023

Code

HS-N-R3-D3-U

Aspect

E

Latitude

44.72500

Longitude

-111.32200

Notes

From Obs, "Noticed this large avalanche in unsupported terrain yesterday morning. I called it HS-N-R3-D3-U although it looks to have failed on facets at the ground. Frequent flyer but impressive. Debris was approx. the size of a football field and 8-10' deep, ran full extent of D3 [track](#).

We dug on a nearby slope. 8050', E/SE, 29 deg. HS 200cm, N/O interface down 40cm. 1cm MFcr with small grained facets above and below. Fair structure, no prop. A bit of grapple mixed in new snow and today's solar input was not warm enough to soften current surf. crust"
