

## Natural Avalanche on Mount Bole

Mt. Bole  
Northern Gallatin  
12/9/2023  
Code  
N-R2-D2  
Aspect  
NE  
Latitude  
45.41600  
Longitude  
-110.99800  
Notes

Natural avalanche on Mt. Bole. Observed taken 12/14/23. Avalanche likely released the previous weekend, around 12/9/23.

From obs: "We were ice climbing on Mummy 3 and 4 yesterday and as we looked across the valley to Mount Bole, we could see evidence of avalanche activity on the NE [aspect](#) of the peak. It looked quite big in length but could tell a depth from that far away."
