

Natural Avalanches and Cracking, Lionhead

Lionhead Ridge

Lionhead Range

1/15/2024

Code

SS-R1-D1.5-O

Latitude

44.71450

Longitude

-111.31800

Notes

From Obs: "While riding today on Lionhead we saw several natural releases on steeper terrain Mainly on Targhee Peak. On all aspects of slopes we experienced large cracks and collapses that would extended 75 plus yards ahead of our sled. We did not venture into steeper slopes but it sure felt like they would [slide](#) easily if we did!"

Second Ob from FB Messenger: Shooting cracks on many slopes. Watch the [video](#) at 10:30 for examples

Number of slides

1

Number caught

0

Number buried

0

Avalanche Type

Soft slab avalanche

R size

1

D size

1.5

Bed Surface

O - Old snow

Problem Type

Persistent Weak Layer
