

Upper snow pack slabbing up, active wind loading noticed.

Date

Wed, 01/17/2024 - 15:05

Activity

Skiing

Snowmobiling

Generally stiffer and more supportive wind slab in the upper snowpack overlying early season facets. Our approach track to Frazier basin was filled back in by wind load by the time we exited the zone(less than one hour)

Region

Bridger Range

Location (from list)

Fairy Lake
