

Wind slab avalanches in Naya Nuki Bowl

Naya Nuki Bowl

Bridger Range

12/18/2024

Code

SS-N-R2-D1.5-I

Aspect

E

Latitude

45.88830

Longitude

-110.95900

Notes

From the top of The Throne, we got eyes on two avalanches that occurred naturally during the major wind event yesterday in the bowl south of Naya Nuki. The largest of which was a R2-D1.5 that broke in the new snow in the main part of the bowl. The second avalanche (R1-D1) broke off the ridge near the summit of Naya Nuki and ran 150'.

Number of slides

2

Number caught

0

Number buried

0

Avalanche Type

Soft slab avalanche

Trigger

Natural trigger

R size

2

D size

1.5

Bed Surface

I - Interface between new and old snow

Problem Type

Wind-Drifted Snow

Vertical Fall

300ft

Slab Width

150.00ft

Snow Observation Source

[Pleasantly Surprised on The Throne](#)

Slab Thickness units

centimeters

Single / Multiple / Red Flag

Multiple Avalanches

Advisory Year
