Wind slabs in the Bridgers

Date Sat, 02/22/2025 - 17:30 Activity Skiing

Saw a recent cornice triggered wind slab off of Hardscrabble Peak, crown looked fairly fresh. There was a second crown line below the rock band. Conditions were very windy, with snow still being transported. Most snow surfaces were wind affected, but saw no cracking or collapsing.

Region Bridger Range Location (from list) Hardscrabble Peak Observer Name Florence Miller
