## **PWL Avalanche in Muddy Creek**

Buck Ridge Northern Madison 2/16/2025 Code

SS-R3-D2-O

Elevation

8700

Aspect

Ε

Latitude

45.17190

Longitude

-111.38000

Notes

In nearly 45 miles of riding, we noted two avalanches. Both breaking on persistent weak layers a few feet down in the snowpack. The first was a small north-facing pocket in the First Yellow Mule (R1-D1) that was snowmobile triggered. It looked to be around a week old. The second was a larger avalanche (R3-D2), east-facing, deep in Muddy Creek. This was drifted in and likely broke around 2.5 weeks ago during the last significant storm cycle.
