

Cornice fall and wet loose avalanches

Date

Fri, 04/11/2025 - 12:30

Activity

Skiing

Today I was skiing in East Hayden Creek. I witnessed a [cornice](#) fall around 1230pm. Also I triggered multiple wet loose avalanches on several aspects including a north facing slope 9400 ft. None bigger than D1

Region

Cooke City

Location (from list)

Hayden Creek

Observer Name

J Mundt
