

Touchy wind slab on Bridger Ridge

Date

Tue, 04/22/2025 - 16:05

Activity

Skiing

NE facing ridgeline near Hidden Couloir was touchy, with a 6-8" stiff wind slab breaking quite easily underfoot. Not the first person to ski Hidden, so observed this slab was not propagating far, but was breaking easily as temps heated up.

Region

Bridger Range

Location (from list)

Bridger Bowl

Observer Name

M. Standal
