Notes: http://www.mtavalanche.com/images/13/snowpit-bridger-range?size=_original for pit from Jan 4 at this location. On Jan 4th, nsf's existed but no load. Now, just enough wind loading to build a slab, but the HS of 92 shows that this site rarely gets a wind load even though it is next to the ridge.
 Video at: <http://youtu.be/cAwDfj6huYw> Several ECTN's but mostly ECTP.
