 Slope Angle: **33°**  
 Wind Loading: **previous**

Stability: **Fair**  
 Air Temperature: **-7°C**  
 Sky Cover: **OVC**  
 Precipitation: **NO**  
 Wind: **W Moderate**

HS140  
 Stability Test

Notes: I would not have skied the steepest part of this slope.

This week's new snow buried a layer of facets sitting on an ice crust on a south facing slope off Henderson Ridge. This layering does not seem to be widespread, but the low test scores with a growing wind slab are enough to cause concern. Photo: GNFAC
